1 Introduction

This is the introduction to the paper. Below, we include a diagram to illustrate the holographic principle.

Figure 1: Holographic Principle: Bulk spacetime with boundary quantum field theory and minimal surface.

Figure 2: Contributions to Boundary Area: Topology and Curvature.

$$S_{\text{BH}} = \frac{k_B c^3}{4G\hbar} \int_{\text{horizon}} (\chi + f(R)) d\Sigma$$

Figure 3: Black Hole Entropy: Topological and Curvature Corrections.

Figure 4: Gaussian Curvature Examples: Sphere, Torus, and Saddle Surface.

Figure 5: Minimal Surface in Curved Spacetime: Ryu-Takayanagi Formula.

Figure 6: Influence of Ricci Scalar on Local Curvature.
